**LIST OF PERIODICALS AND SERIALS
IN THE MUSEUM'S LIBRARY**

INTRODUCTION

Since its foundation in 1946, the Iraq Natural History Museum aimed at becoming a scientific centre for the study of animal and plant life in Iraq. It was envisaged from the beginning that study collections, field work and reference library are cornerstones of biological research, and that the Museum should provide these facilities to any one interested in the study of nature.

Emphasis was laid on building up the library, as well as the study collections. In 1950 the Museum started publishing the first number of its series, *Iraq Nat. Hist. Mus. Publications*, and exchange agreements were soon negotiated with a number of foreign museums, universities and learned societies. Our mailing list swelled up year after year, and a great number of more or less important publications were arriving regularly. Later in 1961 a second series of publications was started under the title: *Bulletin of the Iraq Nat. Hist. Museum*. Both series are offered on exchange basis, and are attracting the attention of other institutions aiming at establishing exchange relations with the Museum.

The Library absorbed much of the limited funds available to the Museum, and continued on ordering new and classical works of reference including many fundamental journals and out-of-print books on all biological subjects. The number of holdings increased steadily, and as more funds became available growth was impressive. Only 1035 books were present in the library at the end of 1950 (five years of the Museum's life), the number slowly rose to 2785 by the end of 1955, then more than doubled to 7205 by the end of 1960. Now, at the end of 1964, (the dead line for this publication) the number reached the 12,650 limit. It is hoped that by 1970 the 20,000 mark will be attained.

The tremendous growth of the Library over the years, coupled with its excellent selection of natural history books, monographs, and specialized periodicals led to its recognition by the University of Baghdad as the central research library for biological sciences. The Library, as such, renders its services to the Biological Research Centre of the University, a new institute which works in collaboration with the Museum to promote biological studies in Iraq.

The present "List" embodies all journals, museum publications and annual reports which the Library acquired through exchange and purchase. It is arranged by countries to render it possible for our exchange partners to fill up the gaps in our holdings of their own publications. We usually receive many reprints or papers from different sources, and these are filed separately. Included in the "List" are some monographs (faunas or floras) which we receive on exchange basis. Other multi-volume works present in the Library are not recorded here, because they are beyond the scope of this compilation.

The "List" should be of much value to our fellow biologists and librarians in other colleges who would like to be familiar with the range and scope of our holdings. For their own interest the titles are indexed alphabetically at the end, and if their main contents are not obvious, an indication in general terms was made. Suggestion for the addition of new titles in their respective fields are welcomed.

The present holdings of periodicals and serials are, in most cases, brought up to the end of 1964, but they will continue to arrive in the future. However, new titles or back volumes shall be added as they become available, and for such additions supplementary lists will be published once a year.

Acknowledgement

The Iraq Natural History Museum acknowledges with deep gratitude and thanks the generous grant of £5000 made by the Calouste Gulbenkian Foundation, Lisbon, Portugal, towards the purchase of books and periodicals for the Library. It was possible with these funds to acquire a number of important journals and works of reference which proved of much value to our research biologists.

قائمة المجلات والنشرات الدورية في مكتبة المتحف

تتضمن هذه القائمة اسماء المجلات والنشرات الدورية الموجودة في الوقت الحاضر في مكتبة متحف التاريخ الطبيعي والتي ترد اليه عن طريق التبادل أو الاشتراك ، مع بيان بالمجلدات أو الاعداد الموجودة والاشارة الى النواقص التي تسعى المكتبة الى توفيرها اكتمالا للسلاسل . وقد وضعت هذه القائمة لفائدة الباحثين والمراجعين من زملائنا الاساتذة وكذلك لموظفي المكتبات في كليات الجامعة ومكاتبها المركزية ليتعرفوا على نوعية المراجع الدورية المتوفرة في مكتبة المتحف .

والمتحف يسعى دائما لاضافة عناوين أخرى من المجلات البيولوجية على ضوء متطلبات بحوث الاساتذة واقتراحاتهم وبحدود الامكانيات المالية ، كما يعمل على ملء النواقص وتوفير المجلدات القديمة على قدر الامكان . ولا بد من الاشارة الى ان كافة المجلدات التي تصل المكتبة الآن ستستمر في الورود في السنوات المقبلة ، أي ما بعد سنة ١٩٦٤ التي كانت نهايتها الحد الفاصل لمحتويات هذه القائمة ، وسننشر ملاحق سنوية بالاضافات - سواء كانت لعناوين جديدة أو لمجلدات سابقة لم تكن متوفرة في المكتبة أبان صدور هذه القائمة .

وحيث ان الكثير من النشرات الدورية المسجلة في هذه القائمة تردنا من متاحف وجمعيات وجامعات أجنبية على سبيل التبادل فان في نشر هذه القائمة ما يعطي صورة كاملة لموجودات المكتبة من تلك النشرات ويحفز اصحابها على ملء النواقص على قدر الامكان ، وقد توجهنا بهذا الرجاء اليهم ونحن على ثقة بمساعدتهم ايانا في هذا المجال .

وبهذه المناسبة يتقدم المتحف بالشكر الجزيل الى مؤسسة كولنكيان في لشبونة (البرتغال) لتبرعها بمبلغ ٥٠٠٠ دينار لمكتبة المتحف وذلك لغرض شراء كتب ومجلدات علمية ، وقد امكن بهذه المساعدة المالية القيمة الحصول على الكثير من المراجع العلمية المهمة ، والتي لم يكن في المستطاع توفيرها في المكتبة من الميزانية الاعتيادية المخصصة لها .
