## **PREFACE**

As already pointed out in part I of this "Bibliography", the present part is devoted to the literature on Reptiles and Amphibians.

Following the same line of investigation, I have succeeded in listing a little more than 200 references on the Herpetology of Iraq and neighbouring countries. The list has been brought to date through the addition of what was available to the compiler from the literature published in 1954.

It is hoped that this paper will render much help to the students of the fauna of this region.
