## PREFACE

With this part, devoted entirely to fishes, we conclude our "Bibliography on Vertebrate Fauna of Iraq and Neighbouring Countries". The whole series of four parts accounted for almost 1210 references on the fauna of the Middle-East, excluding Invertebrates.

The distribution of entries on the main groups is as follows:—

Mammals	...	...	...	285
Birds	...	...	...	474
Reptiles & Amphibians	...			204
Fishes	...	...	...	246

The compiler will prepare a comprehensive list covering those references which have lately been traced by him, or brought to his notice, as well as all future papers or notes that shall be published during 1955.

BASHIR E. ALLOUSE.
