## PREFACE

This part of the "Bibliography" deals with the Molluscan Fauna of Iraq and neighbouring countries, and lists 368 references, mainly on recent forms. It is intended to be the first in a new series on the Invertebrate Fauna of our region, on the same line as for the vertebrate groups, formerly published in four parts.

Although the present compiler has no further lists for publication, he does hope that, sometime in the future, time and facilities will permit him to continue the series for the remaining invertebrate groups. Additions or corrections to the formerly published bibliographies will not be interrupted, as further information becomes available.

In the compilation of the main body of this bibliographical work (in 1952), I have been allowed free access to the magnificent Library of the University of Michigan, and for this assistance I am greatly indebted.

Finally I wish to extend my deep gratitude to Drs. Joselyn Van Type (Dept. of Birds), Emmet T. Hooper (Dept. of Mammals), Reeve M. Bailey (Dept. of Fishes), and Henry Van der Schalie (Dept. of Molluscs), all of the University of Michigan Museum of Zoology, for their kind help and encouragement during the preparation of these bibliographies.

## مقدمة

لقد جعلت هذا القسم من قائمة المراجع خاصا بالحيوانات الرخوة أو النواعم التي جاء وصفها أو ذكرها في الكتب والمقالات والرسائل التي نشرها الباحثون والرواد والرحالون عن العراق والاقطار المجاورة في مختلف المجالات العلمية بين السنوات ١٨٢٧ - ١٩٥٥ . ويبلغ عدد المراجع التي استطعنا العثور عليها ٣٦٨ مرجعا .

ان اكمال هذه السلسلة الجديدة عن الحيوانات اللاققرية لمنطقتنا منوط بتوفر الوقت والمراجع الكافية للاستمرار على جمع المعلومات المطلوبة ، وحتى يتحقق ذلك ستظل السلسلة متوقفة عند هذا الحد الذي بلغناه .

ولا بد لي من التنويه بأن الجزء الاكبر من هذه المراجع قد حضر في سنة ١٩٥٢ عندما كنت في جامعة ميشيكان ، مستفيدا من التسهيلات التي قدمت لي في مكتبة الجامعة الغنية بالمراجع والمجلات ، قديمها وحديثها ، فأنا مدين بالشكر لهذه المساعدة الثمينة . كما أرى من واجبي ان اعترف بفضل الاساتذة الذين أولوني تشجيعهم ومساعدتهم اثناء قيامي بهذا العمل وهم الدكتورة : جوزلين فان تاين ( قسم الطيور ) ايمت هوبر ( قسم اللبائن ) ريف بيلي ( قسم الاسماك ) وهنري فان دير شالي ( قسم النواعم ) وجميعهم من هيئة متحف علم الحيوان التابع لجامعة ميشيكان .

وأخيرا فاني أشكر وزارة المعارف وعمادة كلية الآداب والعلوم لموافقتهما على نشر هذه المراجع ضمن سلسلة منشورات متحف التاريخ الطبيعي العراقي .
